Type of Program

Lab & Office / 办公及实验室

Size

7,000 SQM / 平米

Awards

MIPIM ASIA AWARDS 2017

Best Chinese Futura Project

MIPIM 最佳中国未来项目

This development is located at Shanghai Zhangjiang Hi-Tech Park and is close to the Chuanyang River. It is aimed to build a pleasant working environment for science and research, to upgrade the quality of the surroundings through high-end R&D offices, and to create a new landmark in the Zhangjiang Hi-Tech Park. The center is a clean geometric volume modulated by the organization of building components, the views to the Chuanyang River, and connection to the Chinese National Compound Library on the west through a sky corridor. A solid wall will be set up along the highway so as to reduce the noise and strengthen the power of this landmark building. Conference rooms will be arranged on the first and second floors while office and research space will be on the above floors.

项目位于上海市浦东张江高科技园区，毗邻川杨河。项目旨在打造舒适的科研环境，并以高端科研办公提升完善的周边品质，成为张江药谷新地标建筑。该中心的建筑主体呈现出一种简洁的几何组合，将建筑元素和川杨河景观融入布局中，并用空中连廊串联起西侧的国家化合物样品库。在高架桥侧采用实体墙面阻隔噪音影响，强化力量感的地标性。一楼和二楼为会议室，而三层及以上为办公科研区。
