Type of Program

Landscape Design / 景观设计

Size

2,553 SQM / 平米

East Lake Park has a superior geographic location by sitting at the end of Wuhan Avenue. Too much shady green trees make the current main entrance unattractive and less important. In the new design, a full circle sky walkway is lifted up at the south entrance and extended to the lake surface. Tourists are encouraged to walk through the pedestrian for having a wider view of the lake and natural surroundings. The visitor center is re-located next to the sculpture on the south of the entrance. It'll be a trapezoidal 2-story building with green ramps attached on both sides. Ramps provide access to the 2nd floor. French glass decoration makes the interior clean and transparent. In front of the visitor center, a sunken ramp will be dug out along the riverbank to allow visitors be more intimate with water resources of Eask Lake.

东湖风景区坐落在武汉大道城市轴线末端，地理位置优越。当前园区入口处树林过分茂密，使入口和梨园广场失去吸引力。在新设计中，南入口设置一个环形空中步道，视线上延伸至湖面。游客穿过布道到达顶部，眺望整个东湖和周围美景。游客中心被设置在南入口的雕塑旁，是一座两层梯形的建筑，用绿色植被覆于左右两边的人行斜坡上，直达二楼。落地窗户使内部通透明亮。在游客中心前挖凿下沉亲水步道，让游人更为亲近东湖自然水景。
